OCTOBER 2011

GDOT Unveils Winter Weather Plan

Last winter's uncharacteristic ice storm caught Georgia's citizens, businesses and agencies by surprise. The Georgia Department of Transportation (GDOT) has been working on being prepared for the worst while hoping for the best.

Eric Pitts, state maintenance engineer, gave an in-depth presentation of the Department's inclement weather plan to State Transportation Board members during their monthly Board meeting.

"We have modified our policies and procedures on snow and ice removal," said Pitts. "We want to keep traffic moving in a safe and uninterrupted manner."

The Department has coordinated with local governments, purchased equipment and increased its manpower in preparation for the worst of storms.

"One of the major things we have done since the (ice storm) is begin working with our contractors," said Pitts, professional engineer. "We just don't have enough equipment across the state to treat and handle all of our roadways."

Senate Resolution 30 was passed last year and made it possible for GDOT to enter into contract agreements for assistance with ice and snow

GDOT plans to use new plows and the help of contractors to keep two lanes in passable condition on Interstates routes during inclement weather.

removal. The Department currently has 10 contractors on call for storms and continues to search for more.

Additionally, GDOT has upgraded worn-out equipment with new or replacement equipment. The Department purchased 112 plows, 155 salt and stone spreaders and six new pre-treat slide-in liquid tanks. The equipment is expected to be available by the end of November.

In addition to increasing manpower and improving the status of equipment, the Department has been working with local governments to improve coordination going into the winter season. So far, two intergovernmental meetings have been held with a third to be held in November.

Georgia isn't known for severe winter storms. However, the weather event that occurred earlier this year has left local and state agencies with a heightened level of awareness. GDOT has made arrangements and is ready to respond to the inclement weather events that may occur this coming winter.

New salt storage facilities will be strategically placed along the Interstate system.

Several Board committees met in advance of the full Board Meeting. Meeting highlights are below:

Finance: The Committee was given updates on the first quarter FY 12 Budget and the federal transportation bills current state.

Legislative: The Committee received presentations revealing why the industry believes truck weight limit increases would positively affect commerce.

Administrative: The Committee was presented with changes made to the Outdoor Advertising Rules. The changes will be opened to the public for 30 days.

Intermodal / Statewide Transportation Planning: The findings from the Statewide Freight and Logistics Study was shared with the Committee. The study is in the fifth and final stage of the action plan, which looks to make Georgia the global gateway of choice.
