#### Drums

The Department does not maintain an approved list of Drums at this time. Drums used on Department projects must be NCHRP 350 compliant and meet Georgia Department of Transportation Subsection 150.05.A.1.a.1. In addition Drums shall meet the minimum requirements of the MUTCD Section 6F.62 and shall be reflectorized as required in Subsection 150.01.C.

The upper edge of the stripe on the drum shall be located a minimum of 33 inches above the surface of the roadway. A minimum drum diameter of 18 inches shall be maintained at a minimum of 34 inches above the roadway. Drums should be round providing a minimum of 270 square inches of specified sheeting facing the traffic at all times, with an allowance for one flat side, tab or flange to keep them from rolling into traffic. Drum tops may be rounded to prevent water and debris from collecting.
